SÖRLING

OUR WAY TORWARDS A SUSTAINABLE ORGANISATION

SUSTAINABILITY POLICY

- Sörling shall protect the environment and comply with regulations and binding requirements. By constantly evaluating and developing our business, we work with the goal of improving our sustainability performance.

- We work actively for a sustainable development with reduced energy use and minimized material consumption. Further more, we will contribute to improving our suppliers' and customers' operations.

- We intend to offer a safe, inclusive and safe work environment with committed, motivated and well educated employees.

- We support our policy with:

    - Development of high performing lightweight bodies for trucks and trailers. To achieve this, we use less materials yet increas ing the efficiency in both load capacity and fuel consumption. The development process also includes a safer and more efficient operation, with an optimized use of materials.

    - Continuous measurements of energy, water and waste with the objective to reduce total waste and increase the share of circular economy.

    - Continuously evaluate chemicals to identify and exclude harmful emissions that may have a negative impact on humans and the environment. We ensure a risk - free use of chemicals and are well prepared in the event of incidents, so that we minimize pollution of soil, air and water.
